

## Skeletal Outline

You may want to use this skeletal outline, a practice from the module on teaching powerful note-taking, to keep track of your learning and the resources in this module. Each module is designed to support the development and refinement of teaching practices in relation to the module learning objectives. You can use this skeletal outline to make note of what you would like to remember and perhaps revisit.

### Learning Objectives

To begin, refer to the module overview and write down the learning objectives and practices that you are most interested in exploring below. Keep these practices in mind as you engage with the module activities and assignments to help you focus on what is most important to you.

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_
4. \_\_\_\_\_
5. \_\_\_\_\_
6. \_\_\_\_\_

### Classroom Demonstration & Technique Talk

Use the space below to write down the key ideas you learned after viewing instructors demonstrating the recommended practices and hearing more about the topics from the experts.

**Implementation Resources**

Explore the implementation resources provided in this section and jot down your ideas for using these resources when implementing the practices that are most interesting to you.

**Common Challenges & Misconceptions**

Use the space below to write down a research-based suggestion or clarification that you want to remember.

**Observe & Analyze**

What did you learn about the module practices by watching the video and participating in the discussion forum? Which module practices are used effectively? How might these videos impact your implementation of the module practices?

**Practice & Reflect Planning**

Use the space below to plan for completing your reflection assignment.

Which practice(s) do you plan to implement?
In which class(es) or course(s) do you plan to use these practices?
When will you implement this practice?
What are you hoping to achieve by implementing this practice?
Notes:
